

Ruby Gold Mine

A prestigious fully permitted California gold mine, offering a fast track to production targeted at 10,000 ounces of gold per year.

- Turn-key gold mine with current permits, active reclamation bonds, and extensive infrastructure—including onsite placer and quartz processing mills.
- Approximately 4 miles of un-mined, gold bearing gravel channels identified on the property. Geologists estimate gold resource potential of over 150,000 ounces.
- Newly developed mining plan projects a total capital expenditure of \$1.5 million to fund an operation to profitable production in year 2 and a target production rate of 10,000 oz/year.
- 1,700 acre land position with a combination of patented mineral rights and unpatented mining claims. Located in Sierra County, CA with a paved, county-maintained road to the property; 2 ½ hours to the Sacramento International Airport. PG&E power on site.
